METAL PANELS

WE CAN GIVE SHAPE TO YOUR MOST BEAUTIFUL DREAM

Ayushman Enterprises established in 2012 in Delhi, with vision of meeting client experience through design thinking. With innovation at its core, we started in core manufacturing of steel and Aluminum machines.

We expanded our expertise in Aluminium cladding, and entered in FACADE solution in year 2017. Since then we have partnered with more than 100 clients & customers across India to provide 1000 plus complex design solutions. We provide expertise in Zinc cladding, Aluminium coins, Aluminium sequins, Aluminium keys, Shingles, perforated and many complex designs.

To name a few of our prestigious clients, we have worked with Mankind owner, L&T, IGI Airport and many more.

innovation **TO YOUR
HOME**

Together shaping the future with sustainable beauty. Since 1892.

NedZink has been manufacturing the highest quality zinc products used in both large and small-scale projects worldwide for over 125 years. This ranks NedZink among the top four zinc producers in the world. Rolled titanium zinc is produced at the ultramodern plant in Budel-Dorplein (NL) and subsequently processed for applications in façade cladding, roofing, gutters and rainwater drainage systems.

Future-oriented management and investments in the very latest production techniques boost our market position and provide scope for new developments. NedZink contributes to a social economy and the future by producing natural zinc products sustainable and processing them for the building industry. What's more, zinc looks highly appealing and symbolises NedZink's mission.

Together shaping the future with sustainable beauty.

Sustainable & Social

People and the environment are key at NedZink. We are convinced that we can only be successful in the long term if we also assume our social responsibility. We do this by continuously improving the sustainability of our processes and focusing on our employees and the people around us.

Step by

stepAfter we began installing solar panels in 2019, we expanded this vision in 2021, In addition to installing solar panels, NedZink also transforms gas into 100% green electricity. This will significantly reduce CO₂ emissions and enable us to take another sustainable step towards eventually producing our titanium zinc 100% sustainably.

Here's a list of our sustainable achievements.

ZINK HAS A DURABLE ENVIRONMENTAL PROFILE

Due to protective zinc patina layer, zinc has a very low corrosion rate.

END-OF-LIFE ZINC IS 100% RECYCLED

Zinc keeps its physical properties after remelting and its very high metal value after the first use phase.

NEDZINK STANDS FOR QUALITY

NedZink manufacturing and products meet the highest European quality standards.

NEDZINK SCORES BEST ON ECO FOOTPRINT

Our Environmental Product Declaration EPD outperforms our competitors.

NedZink material is supplied in the form of coils, sheets, strips, gutters, pipes, and accessories. NedZink offers a wide range of dimensions and thicknesses, not only in NedZink NATURAL, but also in the other material types.

NedZink NATURAL

Natural zinc that develops a patina over the years, as a result of weather conditions.

NedZink NEO

Process patinated titanium zinc with a matt subtly brushed surface in mineral grey.

NedZink NOVA

Process patinated titanium zinc with a matt, subtly brushed surface in natural grey.

NedZink NOIR

Process patinated titanium zinc in anthracite black.

NedZink NUANCE

Process patinated titanium zinc with pigments. Depending on the pigment chosen, this results in a pre-patinated zinc variant with a blue, red, green or brown hue.

NedZink COMPOSITE

A panel consisting of 2 layers of pre-patinated 'NedZink NOVA' zinc and a plastic core (LDPE).

NedZink Pro-Tec

Titanium zinc produced by NedZink with a protective layer on the back for applications on both cold and hot roof constructions.

Technical info and documentation

NedZink provides technical advice throughout a project, starting with the architect and extending to the building site. In addition to excellent product quality and an extensive guarantee, NedZink offers its customers assistance with daily processing. Please contact NedZink's technical department for immediate assistance or advice on design, detailing, planning and processing. We have extensive technical information available in printed or digital format to answer questions regarding technical use.

Warranty

NedZink's technical know-how and well thought-out quality management, combined with regular quality tests by Independent inspection bodies, guarantee uniform high quality of our finished and semi-finished products. Nevertheless, it is still possible for an issue to occur. In this case NedZink offers its customers the security of a direct warranty claim so that any damage is settled quickly and professionally.

A revolutionary parametric facade system designed to elevate architectural aesthetics. Crafted with premium metals and enhanced with Aluminum Surface finishes, Aluminum Coin offers unparalleled customizability, from the shape and size of each element, to its color and arrangement. Its dynamic design reacts to light and perspective, creating ever-changing visual effects. Ideal for contemporary and iconic structures, Aluminum Coin transforms facades into captivating works of art that are sustainable, durable, and visually stunning.

Elevate your structure with Aluminium Shingles, a system of overlapping metal panels designed to create dynamic textures and visual depth. Fully customizable in shape, size, color and finish, Aluminium Shingles offer endless design possibilities to suit any architectural vision. These shingles bring a contemporary flair to facades while ensuring durability and weather resistance. Perfect for residential and commercial projects, Aluminium Shingles strike a balance between aesthetic appeal and robust functionality, allowing you to tailor your facade to your unique style.

An architectural ode to natural harmony, Aluminium Keys incorporates aluminum and stainless steel in flowing forms that mimic the rhythm of nature. These facades resemble the gentle hum of wind chimes or the flutter of butterfly wings, captivating viewers with their elegance. Ideal for tranquil, design-forward spaces, Aluminium Keys creates a seamless blend of beauty and function.

Elevate your structure with Aluminium Shingles, a system of overlapping metal panels designed to create dynamic textures and visual depth. These shingles bring a contemporary flair to facades while ensuring durability and weather resistance. Perfect for residential and commercial projects, Aluminium Shingles strike a balance between aesthetic appeal and robust functionality.

A versatile facade solution, MetaCassette offers three distinct panel types—grooved, perforated, and solid—each designed to bring unique aesthetic and functional qualities to architectural projects. Together, these options empower architects and designers to craft facades that are not only visually captivating but also tailored to specific functional requirements.

A sleek solution for architectural facades, MetaFlute combines lightweight yet durable metals to create rhythmic, vertical lines that enhance any structure. These extrusions shield buildings from harsh weather while adding a touch of modern sophistication. MetaFlute is ideal for projects requiring elegance, resilience, and minimal maintenance.

Durable and versatile, Solid Panels are crafted from premium metals for seamless, modern facades. With exceptional weather resistance and low maintenance, they suit both bold designs and intricate architectural projects. Fully customizable in size, finish, and color, Solid Panels blend strength with aesthetic appeal for a variety of applications.
